

## Dr Padmaja Fertility Centre: completing families

Hyderabad's fertility centre run by Dr Padmaja Divakar is giving assurance and happiness to couples who have waited for long to complete their family

**D**r Padmaja Divakar is a post graduate in GynObs from Osmania Medical College with 20 years stand in private medical practice by establishing a Maternity Hospital "Navya Nursing Home" in the suburbs of Hyderabad @ Bhongir Town, who started her IVF practice there and subsequently opened her fully fledged ART Centre "DrPadmaja Fertility Centre" in Habsiguda, Hyderabad in 2010 and then second IVF Centre in Gachibowli, the happening IT Region of Hyderabad. She is assisted by her husband Mr M Divakar Reddy, who was a practising lawyer, wound up his legal profession, to be the Managing Director of the Company, running these three units besides supervising the surrogacy work. She is on the Board as Medical Director of DrPadmaja Fertility Centres Private Limited, Hyderabad and is a consultant in all the units supported by some 10 Gynecologists, 10 other Assistant Doctors and Five Embryologists...this Team under able guidance of this couple, named as Team@PFC, is doing a quality work in all the infertility treatment solutions like IUI, IVF, IC-SI, SURROGACY and strictly as per the norms as framed by the Government.

Dr Divakar is much interested in ART work, mitigating the vows of desperate infertile couple living in India and overseas. The success rate is as high as 30 per cent in IUI, 40% to 60 per cent in IVF and 75 to 90 per cent in Surrogacy for the last about one decade.

The Team@PFC further believes that Surrogacy and Gamete Donation should be allowed, may be with suitable guidelines as it gives an opportunity to the growing infertile couples, with issues on both male and female sides and would help our society to avoid social evils like 'selling of babies' among the lower income groups which became the usual happening of the day and give a solution for the shortage of babies available for adoption these days may be because of awareness among the people or for the disappeared practice of sparing a baby to be given in adoption to a brother or sister because of the changed social scenario

Dr. Padmaja Divakar

where human relations have narrowed down to the worst and selfcentredness got onto rule the socioeconomic arena among all sections of society in general across the world !!!

The Team further proved that there's no mishap to occur or no misuse of women happen in egg donation or surrogacy as it could complete about 400 surrogate deliveries giving away about 550 Babies there being 40 per cent incidence of Twin Borns in Surrogacy and using so many Oocyte donors safely without any unwanted incidence....!!!

The Team believes, that after all "humanity" plays a vital role in all this, and we can prove it to the country by 'without resorting to greediness', by not resorting to malpractices and avoiding misguidance to all the stakeholders, particularly in "Third Party Assisted Reproduction" even in an "ethnic" society like ours with most acclaimed 'ancient culture' kept intact too and give the fruits of scientific research to the needy among us....!!!

At Bhongir, 150 young women have taken the noble cause of helping unfortunate women become mothers through surrogacy. Their gesture is rewarded by a fee ranging between Rs 3.5 lakh to 5 lakh, in addition to nutritious food and comfortable accommodation till delivery. So, one cannot assume that surrogacy is exploiting poor women. People from across the country and overseas have been seeking help of Dr Padmaja which is known for a high success rate of over 90 per cent in case of donor egg use and over 74 per cent in own egg.
